

Bolder Industries

2025-2026

Order Summary

156,654 lbs

At Bolder Industries, we proudly deliver traceable, mass-balanced sustainable solutions by converting end-of-life tires into high-performance materials. Through our proprietary process we've produced BolderBlack® since 2017, enabling customers to formulate performance across a wide range of commercially proven applications that deliver not only cost savings, but also environmental savings.

Our expanded operations in Terre Haute, Indiana and Antwerp, Belgium will each respectively accommodate a capacity of 6.5+ million end-of-life tires annually. We look forward to partnering with you to explore new ways to build on your results by incorporating cost-efficient, sustainable options into other areas of your business, without sacrificing performance or quality.

-The Bolder Industries Team

ENVIRONMENTAL SAVINGS REPORT

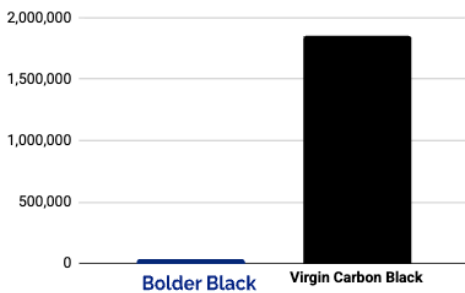

156,654 lbs

22,976

Tires diverted from landfills

Water (gallons) used*

1,818,729

less gallons of H2O used

equivalent to

19,399,778

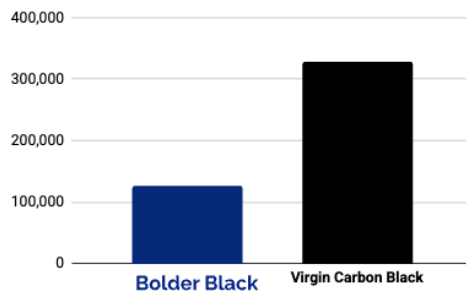

12 oz water bottles

98%

Less H2O used

Electricity (kWh) used*

201,015

less kWh power used

equivalent to

102***

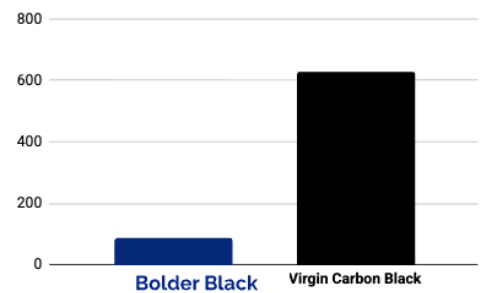

fewer U.S. homes of electricity

61%

Less electricity used

CO2 (tons) produced**

537

less tons CO2 emitted

equivalent to

114

fewer cars on the road

86%

Less CO2 emissions

*based on a life-cycle analysis (LCA) performed by Bolder Industries and technically evaluated by ThinkStep.

**based on a life-cycle analysis (LCA) performed by Vito NV, 2024
